Spanish | Lower Elementary

PROFILE INFO

As a final-year student of Computer Science and Informatics, set to graduate by winter, I am looking for an opportunity to apply knowledge and skills gained throughout studies in a professional environment. I would like to learn what it takes to be a good software developer, both in terms of hard skills and qualities of a good team member.

EDUCATION

2015-2019

Highschool

Prva gimnazija Sarajevo

2019-current

Bachelor degree

Faculty of Electrical Engineering, University of
Sarajevo

Computer Science and Informatics
Third year

PROJECTS

Result App

React.js | Next.js | Node.js | Express.js | MongoDB

For my Bachelor's thesis, I am currently finishing work on a project using the MERN stack. My project involves development of a football result application, that delivers real-time scores, statistics, and match highlights to football enthusiasts. I am also developing the same project using Next.js instead of React.js. Collaborating with a mentor, an industry expert from a software company in Sarajevo, I am gaining guidance and insights into developing dynamic web applications with React.js and Next.js.

Schedule App

Java | JavaFX | MySQL

Application for efficient management of student tasks, simplifying class schedules, assignment tracking, and deadline reminders.

Course Attendance Management App

HTML | CSS | JavaScript | Node.js | Express.js | MySQL

Application for optimizing and simplifying faculty class attendance management.
